

# the **KATTSAFE** *Promise*

## ***Modular System***

KATTSAFE modular guardrail components are fabricated in modular sections. This allows for construction of endless guardrail configurations to suit specific site requirements. Components are robotically welded for a precision perfect finish.

## ***Minimum Lead Time***

KATTSAFE modular components are kept in stock, ready to ship. The components for your guardrail kits are packaged together, and can typically be dispatched within 1-2 days or as required.

## ***Easy Delivery***

The lightweight components are delivered as a flatpack kit, which ensures easier handling and significant savings on freight costs. Depending on the size of the guardrail system, the components can be possibly man handled to the required location or crane lifted once at desination.

## ***On Site Assembly***

Each guardrail system is supplied with the necessary hardware for assembly. Wall attachment is also typically included for wall mounted systems. On-site customization can be achieved by simply cutting the aluminum in the field to meet your projects requirements.

## ***Appearance***

Continuous top and mid rail design results in clean aesthetics. KATTSAFE Guardrail Systems typically blend in with the building and can be custom colored if requested.

## ***OSHA Compliant***

KATTSAFE products and systems are designed and manufactured to meet and exceed OSHA and ANSI regulations as applicable.
